

PLASTIC FILM RECYCLING

how2recycle.info

A Comprehensive Solution for Recycling Plastic Bags, Wraps, and Film in Morris County

Polyethylene plastic bags, wraps, and film packaging cannot be collected curbside for recycling collection. However, these items can be taken to local retail stores where the plastic film is collected for recycling.

After dropping off your plastic film at a store recycling location, it can be made into synthetic lumber for decking, benches for parks, and even made back into another plastic film item.

Specific plastic film packages can be recycled through store drop-off locations. Look for the How2Recycle store drop-off label on plastics which include the list of acceptable items below, for more information.
